EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel Claims 1-23.

Election/Restrictions

This application is in condition for allowance except for the presence of claims 1-23 to an invention non-elected without traverse in the response filed 11/21/05. Accordingly, claims 1-23 have been cancelled.

Allowable Subject Matter

Claims 24-34 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or render obvious a method of forming a slider assembly, comprising: arranging a plurality of sliders each having a surface such that the surfaces are coplanar to each other; dispersing a fluid mixture of first and second monomers in a nonstoichiometric ratio to bond the sliders without contacting the coplanar slider surfaces; and polymerizing the first and second monomers to form a polymeric debondable encapsulant.

U.S. Patent 5,932,113 to Kurdi et al. teaches a method of forming an encapsulant for the air bearing surface of a slider comprising a curable resin, but does not teach dispersing a fluid mixture of first and second monomers in a nonstoichiometric ratio to bond the sliders and polymerizing the first and second monomers to form a polymeric debondable encapsulant.

U.S. Patent 5,516,430 to Hussinger teaches a method of forming an encapsulant for an air bearing surface using a melted adhesive.

Art Unit: 1763

U.S. Patent Application Publication 2005/0243469 to Chaw et al. teaches forming an encapsulant using first and second constituents but does not teach a nonstoichiometric ratio of first and second monomers as claimed.

U.S. Patent Application Publication 2004/0093719 to Dai et al. teaches forming an encapsulant for an air bearing surface using a melted thermoplastic.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
